

AUDREY C. RAMIREZ

773-963-7488 | acr10@illinois.edu | [linkedin.com/in/AudreyCRamirez](https://www.linkedin.com/in/AudreyCRamirez)

EDUCATION

University of Illinois at Urbana-Champaign

Expected May 2029

Bachelor of Science in Computer Science | GPA: 3.91/4.00 | Chancellor's Scholar, Campus Honors Program

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML/CSS, Python, C++, Haskell, R

Tools & Frameworks: Git, GitHub Copilot, Node.js, Docker, GitLab, Dynatrace, Adobe Creative Suite

Fabrication: 3D Printing, Vinyl Cutting, Soldering

EXPERIENCE

State Farm — Software Engineering Intern

May 2026 – Present

Bloomington, IL

- Pioneering an internal dashboard that visualizes Tier 1–3 insurance claim severity, streamlining claims triage for adjusters
- Leverage Dynatrace, GitLab, and GitHub Copilot to monitor application performance and accelerate release velocity

REACH Pathways — Senior Tech Advisor

August 2024 – Present

Chicago, IL

- Champion usability and accessibility improvements by evaluating app features and delivering actionable feedback to the product team
- Drive content strategy for 17–23-year-old users, fueling the platform's growth to 40,000+ users

Field Museum — Digital Learning Intern Mentor

June 2025 – August 2025

Chicago, IL

- Coached and empowered 15 high school interns in web development fundamentals, including HTML, CSS, JavaScript, and Python
- Fostered hands-on learning by guiding students through 3D printing, vinyl cutting, and embroidery machine projects

Whitney M. Young Magnet High School — AP CSP Teacher Assistant

August 2024 – June 2025

Chicago, IL

- Empowered 30+ AP Computer Science Principles students through weekly office hours and individualized project coaching

Field Museum — Digital Learning Intern

June 2023 – August 2023

Chicago, IL

- Streamlined analysis of bone measurement data from 100+ fossorial specimens by applying statistical programming in R, as 1 of 15 selected interns

PROJECT HIGHLIGHTS

Entomology AI Image Processing

June 2025 – August 2025

- Pioneered an AI-assisted workflow to isolate individual specimens from 50+ giga-macro drawer images (100–300 insects each), outperforming manual cropping methods and slashing processing time
- Advanced digitization of the Field Museum's entomology collection — the 5th largest in North America — and will co-author an upcoming publication with Dr. Elizabeth Postema documenting the workflow

Personal CS Projects

August 2024 – June 2025

- Designed, built, and shipped an AI chatbot, interactive LED planet book, and course catalog webpage using JavaScript, HTML, CSS, and embedded electronics

LEADERSHIP & INVOLVEMENT

ColorStack Member

Women in Engineering (WIE) Ambassador — Champion the Grainger College of Engineering's outreach and recruitment through community engagement events

Women in Computer Science (WCS), Bits & Bytes Mentor — Selected for a competitive program fostering professional development and networking among women in computing
